### **RECOMMENDED ACTION**

1. Approve and authorize the City Manager to execute the replacement Subdivision Improvement Agreement with Lennar Homes of California, LLC to guarantee the completion of required public improvements associated with the Legado Phase 1 Backbone Infrastructure Improvements associated with Tract Map No. 37391, located east of Encanto Drive, south of Rouse Road, west of Antelope Road, and north of Chambers Avenue; and
2. Authorize the City Engineer to release 100% of the originally posted securities with BLC Fleming, LLC for the Legado Phase 1 Backbone Infrastructure Improvements, Tract Map No. 37391.

### **DISCUSSION**

Tract Map No. 37391 ("TM37391"), also known as Legado ("Project"), is a proposed subdivision of 331 gross acres of land into 18 large lots for residential, commercial, and park use and 28 lots for roads and utilities. This map was recorded to establish the Project's planning areas that will be further subdivided in the future. TM37391 is part of the Legado Specific Plan by BLC Fleming, LLC, a Delaware Limited Liability Company (BLC Fleming). The Project is located east of Encanto Drive, south of Rouse Road, west of Antelope Road, and north of Chambers Avenue.

On December 2, 2023, the City Council approved and entered into Public Improvement Agreements ("Original Agreements") with BLC Fleming for the Project's phases 1, 2, and 3, to guarantee the construction of the public backbone street, drainage, utility, and landscaping improvements as required by the Project's conditions of approval. BLC Fleming posted all required improvement securities for all three phases of the Project at that time ("Original Securities").

Following the City's approval of the Original Agreements and Original Securities, BLC Fleming provided the City with Increase Riders to the Original Securities' amounts related to flood control drainage for the Project. The amount of the increased drainage securities that were provided resulted from updated cost estimates prepared by the Riverside County Flood Control & Water Conservation District (RCFC&WCD) after City approval of the Project. A summary of the Original Securities for drainage and the associated Increase Riders received is provided in Table 1 below.

<b>Total</b>		<b>\$12,225,500</b>	<b>\$32,898,081</b>

Phase 1 of the Project has now been transferred to a new developer, Lennar Homes of California, LLC, a California Limited Liability Company ("Developer"). The Developer has requested approval of a Subdivision Improvement Agreement ("Replacement Agreement") to replace the Original Agreement associated with the Project's Phase 1 backbone infrastructure improvements. The Replacement Agreement requires that improvement securities ("Replacement Securities") are posted to guarantee the completion of the required backbone street, drainage, water, recycled water, and sewer improvements, and the placement of survey monuments, within 24 months from the City Council agreement approval date. Based on transfer of ownership for Phase 1 of the Project, BLC Fleming has also requested release of the Original Securities and Increase Riders held for Phase 1, as they would be replaced by the Developer with approval of this item.

Staff has reviewed the Replacement Agreement, determined that it meets the requirements of the Project's conditions, confirmed that the Replacement Securities have been posted, and verified that the Original Securities and Increase Riders held for Phase 1 may be released.

Summaries of the Replacement Securities are provided in Table Nos. 2 and 3 on the following page. All Replacement Securities provided by the Developer for Phase 1 drainage improvements have been established in the full amounts previously required by RCFC&WCD.

Due to the volume of security documents referenced in this report, only the Replacement Agreement and Replacement Securities have been provided as attachments. The Original Agreements, Original Securities, and Increase Riders are available, and on file, in the Office of the City Clerk.

It is important to note that only the Original Securities associated with Phase 1 of the Project are being replaced by the Developer and all Replacement Securities provided by the Developer for Phase 1 drainage improvements have been established in the full amounts previously required by RCFC&WCD. The Original Agreements and Original Securities posted by BLC Fleming for Phases 2 and 3 would remain in place.
