

Description
 This District-led project will follow the construction of Stages 2 and 3. Stages 4 and 5 will complete the Line A-3 storm drain system east along Varela Lane from Palomar Road to Malone Avenue. The project will collect water north of Varela Lane and convey it west along Varela Lane in an open channel from the upstream end of Malone Ave to Menifee Road. Water is conveyed in an underground storm drain across Menifee Road to the downstream connection with Stage 3 on Palomar Road. The total length of these two stages is approximately 6,510 lineal feet of underground reinforced concrete box/pipe and open channel. Once the entire Line A-3 is completed, the system will help protect properties located along Varela Lane and east of Palomar Road.

- Legend**
- Romoland MDP Line A-3, Stages 4 & 5
 - CIP Facilities Under Construction
 - Un-budgeted District Facilities
 - FEMA Floodplain
