Details

Below and on the following pages, we outline our work plan to efficiently and effectively guide the City and its stakeholders through the strategic planning process. Sample reports for similar projects prepared for other local government agencies are provided in Appendix B.

Phase 1: Project Initiation and Planning

1.1 Conduct initial project planning. We will conduct initial project planning with the City's project team to identify project milestones and expectations for stakeholder engagement in the strategic planning process. We will introduce key team members, clarify project goals and objectives, identify known project constraints, and refine dates and/or tasks, as appropriate. We will discuss our approach for managing communications between BerryDunn and the City as well as our approach to scope, risk, and resource management. We will also review possible formats for the Final City of Menifee Strategic Plan. These discussions will help us refine our currently proposed Project Work Plan and Schedule.

1.2 Request, compile, and review documents and data. We will request and compile documentation and data to help us better understand the City's current environment and inform engagement activities.

Examples include:

- Key performance metric data
- Program descriptions and data
- Past internal and external assessments
- Past strategic plans and associated material
- Other existing City planning and policy documents, organizational charts, staffing, budgeting details
- Previous surveys of City stakeholders, customers, residents, and staff
- Demographic, economic, and community data and forecasted trends from the U.S. Census Bureau, the U.S. Bureau of Labor Statistics, American Community Survey, U.S. Department of Education, Centers for Disease Control, the Opportunity Index, and other state and local data sources

Once provided, we will review the documentation and data to help us produce an Environmental Scan that will inform community and stakeholder engagement activities.

1.3 Develop a Project Work Plan and Schedule. Based on the information gathered from our initial project planning meeting and document and data review activities, as well as from those details enclosed in this proposal, we will develop the Project Work Plan and Schedule, which will outline the tasks and timelines for the strategic planning process. The Project Work Plan and Schedule will also include agreed-upon procedures between BerryDunn and the City related to project control, including quality management and deliverable submission/acceptance management. After providing draft versions of these materials in advance, we will facilitate a videoconference with the City's project team to review the drafts and solicit feedback. This videoconference will introduce the City's project team to our document review process and provide an opportunity for the City to share input on a critical step in the process. We will incorporate the City's feedback and finalize the documentation before distributing it to the City in final form.

Deliverable 1 – Project Work Plan and Schedule

1.4 Develop communications and messaging. We will develop communications and messaging to build awareness for the process, its intended outcomes, and opportunities for stakeholders to get involved. We will review messaging and communications with the City's project team before finalizing and distributing them.

Phase 1: Project Initiation and Planning

1.5 Develop questions and protocols for interviews and focus groups. In order to understand how the City Council, leadership, staff, community, and other key stakeholders view the current environment and issues of strategic importance—and to gather information for the Environmental Scan and Community Needs Assessment—our project team will develop questions and protocols to guide individual interviews as well as to incorporate in surveys we develop and the community forums we facilitate. We will review the questions and protocols with the City's project team to build consensus and solicit feedback before updating them to final.

Some of the topics we will address are:

- What current and/or emerging trends have the biggest influence on where the City's efforts and resources should be focused?
- What are the potential scenarios that the City should be prepared for in the coming 2, 5, and 10 years?
- What is the most pressing problem or concern facing the City?
- What is the City's long-term vision for the lives of its residents?
- What are the most important and/or critical community needs the City can address in the near future?
- How effective is the City's existing service delivery and programming in meeting the needs of the needs of residents and the community? What service gaps exist, and how should they be addressed?
- What opportunities could more effectively leverage the City's existing plans, efforts, resources, and capacity to achieve better outcomes for residents and businesses in terms of the City's programming, service delivery, and investments across the community?
- What does the City desire to address or accomplish on behalf of its residents and community businesses?

In addition to developing questions and protocols, we will also work with the City's project team to schedule and communicate opportunities to involve appropriate stakeholders and stakeholder groups.

1.6 Conduct Biweekly Status Meetings. Our project manager and lead facilitator, Michelle Kennedy, will conduct Biweekly Status Meetings with the City's project manager on an ongoing basis throughout the strategic planning process. We will use these meetings to describe the activities and accomplishments for the reporting period; plans for the upcoming month; risks or issues encountered during the reporting period; and anticipated problems that might impact project deliverables. We will also use these meetings to highlight any work products and approaches that will contribute to deliverable development.

Deliverable 2 – Biweekly Status Meetings

Phase 2: Community and Employee Engagement

2.1 Conduct interviews with City stakeholders. We will conduct individual and group interviews with the City Council, leadership, staff, community stakeholders, citizen's groups, and others, as appropriate, to comprehensively review and assess City services and the needs of the community. These interviews will be guided by previously developed questions and protocols. Working with these diverse stakeholder groups, we will help ensure alignment and cohesion for the City's strategic direction as well as generate excitement, promote consensus and buy-in, and encourage participation and involvement in the process.

2.2 Develop and administer the City's Social Pinpoint site. We will utilize tools and technology that will help encourage collaboration with the City and its stakeholders. One of these tools, Social Pinpoint, will be

Phase 2: Community and Employee Engagement

customized to reflect the exact goals, needs, objectives, and background for the City's strategic planning project and leveraged to encourage community engagement. We will work in collaboration with the City to help ensure its landing page is built thoughtfully and speaks to its culture. Additionally, within this landing page, City stakeholders will have access to an external survey, idea wall, and other engagement tools that will help gather information related to the City's current environment.

2.3 Prepare for and conduct community forums. Using the ICA ToP® facilitation methodology, we will design a community forum format that is informational, highly-interactive, and engaging for all participants in developing a vision for the City. We will make creative use of digital applications to help ensure forums are engaging and effective. Once prepared, we will facilitate community forums and focus groups to gather perspectives and ideas from the community.

2.4 Synthesize information and develop an Environmental Scan and Community Needs Assessment. We will synthesize our findings and information gathered into a highly visual and compelling slide deck to inform the upcoming strategic planning sessions. The presentation will provide an overview of the City's current environment; outline our strengths, weaknesses, opportunities, and threats (SWOT) analysis; generate excitement for the process amongst stakeholders; encourage new ideas; and foster a sense of optimism for the future.

Deliverable 3 – Environmental Scan and Community Needs Assessment

Phase 3: Strategic Plan Development and Approval

3.1 Develop the meeting design and agendas for Strategic Planning Sessions 1 and 2. We will design and develop the format for Strategic Planning Sessions 1 and 2. Each session's design and agenda will guide strategic planning progress and will include a presentation of the Environmental Scan and Community Needs Assessment to provide participants with a shared understanding of the City's current environment, the trends that are affecting it, opportunities for the future, and key takeaways from engagement activities. Each session will focus on building consensus and refining the strategic priorities identified as well as the City's vision and key results. We will review the meeting designs and agendas for each session with the City's project team before updating them to final.

3.2 Facilitate Strategic Planning Session 1. Strategic Planning Session 1 will be conducted with the City Council and will focus on discussing and deliberating the results of the Environmental Scan and Community Needs Assessment, as well as refining the City's mission, long-term vision, and values statements and strategic priorities and goals. This session will be guided by the previously developed meeting design and agenda, as well as the Environmental Scan and Community Needs Assessment. We will use the ICA ToP® facilitation methodology, designed to produce group consensus, to address and resolve any conflicting values or visions. We will document the outcomes of this session to review with the City's project team and plan for next steps.

3.3 Facilitate Strategic Planning Session 2. Strategic Planning Session 2 will be conducted with the City departmental leadership and staff and will focus on developing objectives, strategies, and tactics, as well as performance metrics and outcome measures. It will be guided by the previously developed meeting design

Phase 3: Strategic Plan Development and Approval

and agenda, outcomes of Strategic Planning Session 1, and the Environmental Scan and Community Needs Assessment. We will document outcomes of this session and review with the City's project team.

3.4 Develop the Initial City of Menifee Strategic Plan Draft. We will develop the Initial City of Menifee Strategic Plan Draft in an agreed-upon format for the final document. This plan will include the City's refined mission, vision, and values statements; strategic priorities and goals; objectives, strategies, and tactics; and performance metrics and outcome measures. It will also include an executive summary and the strategic plan development process and a plan and timeline for carrying out the strategic plan internally and externally. The plan will also include recommended future follow-up activities, considerations for action and implementation planning, and the means to evaluate progress. We will review this draft with the City's project team to solicit feedback and create opportunities for select stakeholders to review and provide feedback, before updating and preparing it for presentation to the City Council.

Deliverable 4 – Initial City of Menifee Strategic Plan Draft

3.5 Prepare and present the plan draft to the City Council. We will present the latest plan draft to the City Council for review, approval, and adoption. Following the presentation, we will make any requested changes from the City Council before updating the plan to final.

Deliverable 5 – Final City of Menifee Strategic Plan

Phase 4: Performance Monitoring

4.1 Develop a performance monitoring strategy, recommendations, and a budget alignment framework. Using the Final City of Menifee Strategic Plan as the basis, we will develop methodologies for monitoring performance within the framework of the strategic plan. The goal is to help ensure that priorities and goals are integrated within the City's budget decision-making process. We will use the City's MenifeeOpen platform for developing associated reporting. We will review the strategy, recommendations, and framework with the City's project team to solicit feedback before presenting it to City leadership and managers in an implementation workshop.

4.2 Prepare final project report and conduct project closeout activities. Once the strategic planning effort is complete, we will develop a final project report based on feedback received and perform closeout activities, including providing the City with documentation developed and collected during the process and conducting lessons learned and knowledge-sharing activities. By conducting this task, the City can rest assured that it is equipped to continue to progress toward its vision and to successfully implement that plan even after the project is complete.

Anticipated Timeline

Table 1 presents our anticipated timeline by phase for the City's further review and consideration. We are happy to move at the City's pace by expediting or elongating the process as needed to help ensure optimal involvement, productivity, and success during this work effort.
